

## Pitchboard

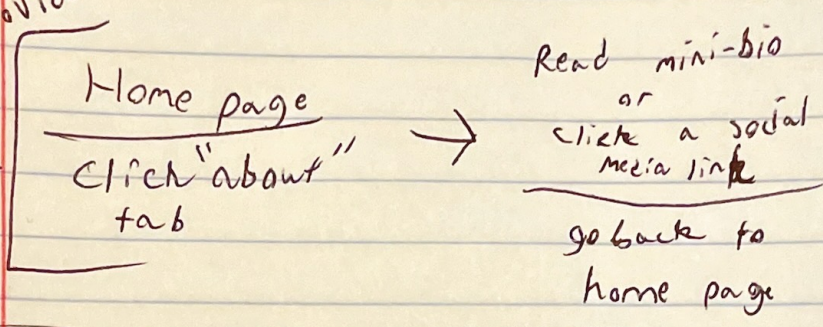

- 1) I would like to create a personal website to show off to future employers as well as friends and family.
- 2) A personal website would be very beneficial to have for the future of my career and something cool to design and make it my own. A website in my name could make it easy for employers to see an attached resume and other links to show off my portfolio. It is also something I can show off to friends and family when asking them to look up my name. A website I can design to feel like my own is one I would like to create as well as have fun doing at the same time.
- 3) **Persona:**
  - a) Employers
  - b) Friends and family
- 4) **Comparative sites:**
  - a) <https://www.garysheng.com/>
  - b) <http://brandoncjohnson.com/>

How to access my resume on site

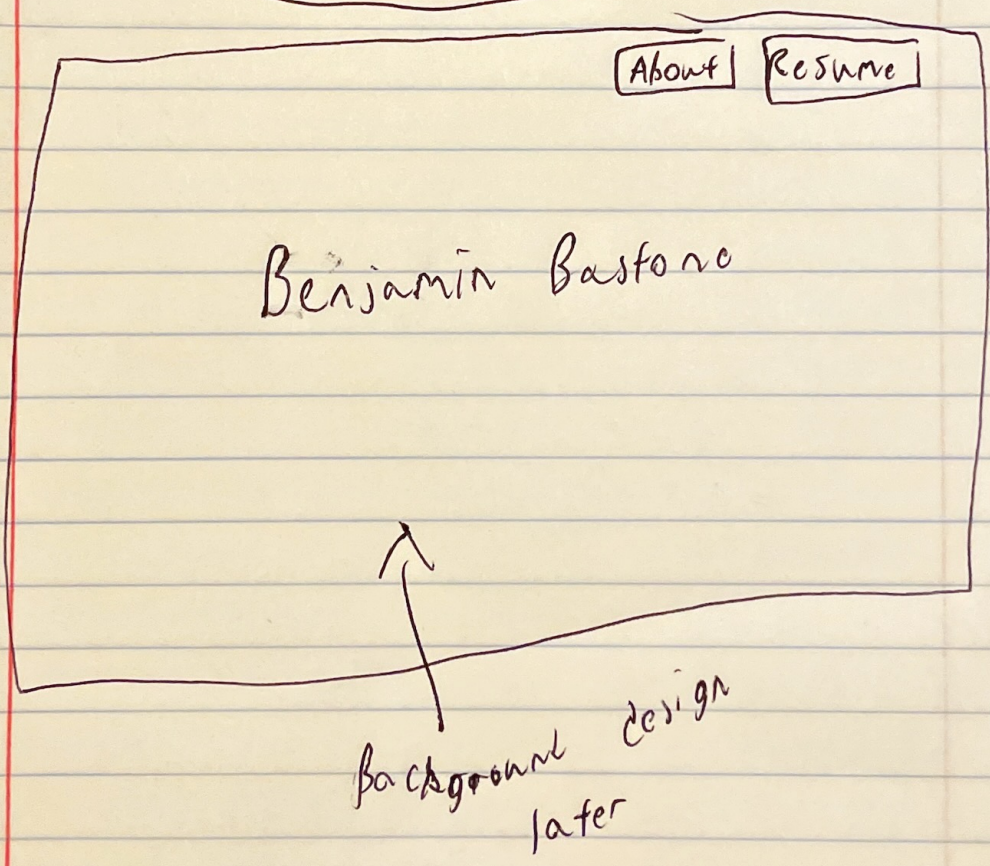

# Shorthand flow

How to read more about me and links I provide

# WireFrame
